Disclaimers:

- All descriptions of HSS products and systems are published for informative purposes only.
- Legal Notice: This document is an instrument of HSS Development and the HSS Group of Companies with offices in Europe. It contains proprietary technologies that may require approvals / licensing from the country it is being offered to.
- All sales and shipping may be subject to license approval - An End User Certificate will be required. If the items herein are for demonstration purposes only, there may be some import regulations to be adhered to.
- Specifications may be subject to change without notice.
- Images may vary from actual systems.
- Training may be available direct from HSS Engineering.

The information furnished in this document is proprietary to HSS Development and Homeland Security Strategies GB Ltd. (HSS). It shall not be disclosed outside the Client for any reason without the prior written approval of HSS. This document shall not be duplicated, used, or disclosed, in whole or in part, for any purpose other than proposal evaluation. In the event of a contract award, or in connection with the submission of such information, the Client shall have the right to see or disclose this information to the extent provided in the contract. This restriction does not limit the Client's right to use data if obtained from any other source without restrictions.

1.0 Overview

Homeland Security Strategies GB Ltd. (“HSS”), in response to a RFI from (the “Purchaser”), has prepared this response. HSS shall be responsible for the “system” Security and Surveillance Demo Kit.

Any additional training may be made available to the client who intends to make demonstrations and presentations using the Security and Surveillance Demo Kit at our manufacturing facility or on location in front of the Government Client - End User. All permissions for engineers / technicians to access a local presentation site will be the responsibility of the purchaser. HSS can offer in-office training, support, and documentation should those be required by the purchaser.

2.0 Model DK1000 (Features & Operations)

In order to DEMONSTRATE the proper system solutions to your Government Clients, Homeland Security Strategies has designed a configurable modular arrangement.

This Marketing Kit can address the growing security and surveillance needs of Governments using informative and live presentation examples for on site meetings.

The system is able to make a presentation on the following technologies to show to Government End Users:

- Cellular Audio Intercept with monitoring & recording protocols (Software Demo)
- Cellular Firewall for denial of service [without RF Jamming] (PowerPoint)
- Bomb Jammer™ demonstration platform to show jamming of remote controlled IEDs
- RF Jamming of Unauthorized voice communications (RF Jammer Demo with modular built-in Jammers)
- Cellular Detection of Unauthorized mobile phone calls (Radio Receiver Demo on ALL cellular phone bands - Global frequency range)

The Security and Surveillance Demo Kit is a multi-purpose sales tool. Made for those who deal with high level Government Clients and their respective vendors, the system can demonstrate our Cellular Jamming technologies, performs software demonstrations of Voice Intercept on GSM networks, including tower survey analysis, targeting suspects in both Random and Targeted modes for COMINT, (including SMS Interception), present managed access of mobile phone control within prison and building facilities, and present the detection of mobile phone activity with cellular detection hardware.

Present Government Security Technologies

With HSS, show the right technologies to the right people.

Your Contacts: People in Government who require Defense and Intelligence Technologies

- Do you supply Government Security Agencies with Electronic Defense Systems?
- Do you work with Presidential or Military security forces?
- Are you involved in Diplomatic Security procurement?
- Can you take the steps required to advise Counter-Terrorist training agencies?

Homeland Security Strategies builds the most advanced Demonstration Marketing Kit for Authorized Dealers who have the connections to decision makers in all facets of Government.

With the DK1000 Demo Kit, you show the configuration that pertains to your Government Client. As a Dealer of our security technology, you are empowered with the tools and the knowledge to sell directly to your Government Clients. A dealer of Homeland Security Strategies listens to the issues faced by Defense and Intelligence Directors.

Demonstrating the functionality of our technologies, a Dealer can expose new solutions that can bring about change to existing and current issues.

NOTE: HSS Jamming technologies are sold and marketed only to United Kingdom and United States Military users, Authorized Government Agency Users, or for export to Authorized Government organizations. Homeland Security Strategies GB, HSS Development, and the HSS Group of companies do not sell or market any of its Jamming technologies for use by private companies or individuals.

3.0 Warranty

The system is under warranty, which begins upon delivery of the system to the client; all the hardware and software delivered to the customer, will conform to the design, performance and manufacturing specifications of this proposal and will operate free from all defects, which may cause the delivered system to fail to conform to the specified functional and/or performance requirements.

The warranty period lasts 12 months starting from the date of the delivery. Support will be provided during this warranty in factory facilities. Warranties and customer's remedies hereunder are solely for the benefit of the customer and shall not extend to any other entity whatsoever. The customer shall be solely responsible for the selection, use, efficiency and suitability of the equipment. This warranty shall not apply if the system or any part thereof has been damaged by improper operation, maintenance, misuse, accident, neglect, fault or negligence or has been subject to the opening of any sealed components without any permissions granted by the seller in writing.

The warranties provided herein constitute this proposal's sole and exclusive liability for defective or non-conforming product, software and services and shall constitute the customer's sole and exclusive remedy for defective or non-conforming product, software and services. Unless specified in this order, all express or implied conditions, representations and warranties, including any implied warranty or condition of merchantability, satisfactory quality, fitness for a particular purpose or non-infringement, are disclaimed, except to the extent that such disclaimers are held to be legally invalid and are in lieu of all obligations or liabilities on the part of supplier for damages.

4.0 Proprietary Details / Intellectual Property

Nothing in this proposal shall be deemed to grant to the customer any rights in patents, copyrights, proprietary information and trade secrets or any title or property interest in or to the software, including third party licensed software, or any of the intellectual property embodied in such software.

The customer shall retain and shall not remove or destroy any copyright, trademark, logos or other intellectual property rights legends or notices placed or contained in the licensed software.

5.0 Proprietary Details / Intellectual Property

The software and the documentation are owned and protected by patent, trade secrets, trademarks, and copyright laws and international treaty provisions. We will grant to the Customer as a result of a purchase order a non-exclusive and non-transferable license to use all software that is embedded in the equipment to be delivered to the extent required to use and operate the System pursuant to the terms of this proposal. The grant for this license is included in the proposed price.

6.0 Restrictions On Use

Restrictions On Use: The Customer shall not, without written permission (i) use or permit the use of the licensed software and/or the documentation for any purpose or use other than the operation of the system supplied to the Customer in accordance with its intended use; (ii) transfer, export, resell, ship or divert the licensed software and/or the documentation to any third party; (iii) reverse engineer, disassemble, or decompile the licensed software in any form or by any means or modify the licensed software or (iv) copy the licensed software and/or the documentation, except that the Customer may make one copy of the licensed software for back-up purposes.
